

# INSTRUCTIONS for HYSTEROSALPINGOGRAM (HSG) or Xray of uterus and fallopian tubes

Patient name \_\_\_\_\_

The appointment for your HSG Date: \_\_\_\_\_ time: \_\_\_\_\_

It is scheduled at Visconti Imaging. 1114 Charlevoix Ave., Petoskey

Phone no. [\(231\) 439- 9700](tel:2314399700)

Dr. Heidtke will meet you there to perform the XRay.

Take your 1<sup>st</sup> antibiotic dose ~1 hour prior to your arrival at the facility

There may be some mild discomfort or cramping during the Xray.

To minimize this, you should take 600 to 800 mg. of Ibuprofen (3 or 4 over the counter tablets), also an hour before your appt. time. The testing takes 10 to 15 min. You can resume normal activities right away.

Dr.Heidtke will go over the results with you immediately after the Xray, and make plans for follow up as needed.

To minimize risk of infection (which can affect fertility), finish all 3 days of antibiotics.
